

The SLY Difference in Dust Collection

At Sly, what makes us different from other dust collection vendors is what makes us better:

We've been in the business longer than anyone else:

Sly, Inc. was founded almost a century-and-a-half ago in 1874 and we haven't lost sight of the importance of serving our customers' needs.

We have the flexibility to meet your schedule:

All Sly Dust Collectors are designed and built to your specifications, so we don't keep finished units in stock. Our typical delivery times for larger units are typically from 12 to 14 weeks from the receipt of the order. However, because we build our systems in our own shop, we can often arrange for expedited delivery.

We bring an in-depth understanding of the relevant regulations and standards to the design and construction of your system.

Sly has been in the Dust Collection business for as long as there have been Dust Collectors.

We provide responsive, detailed proposals:

Before you buy a Sly Dust Collector, you'll understand what you're getting and what it can do for you.

We deliver meaningful emissions guarantees:

We don't believe in making empty performance promises.

We employ engineers, not order takers:

Other companies often don't have trained engineers on staff who can understand your questions and recommend solutions.

We believe in delivering responsive, personal, hassle-free customer service:

When you become a Sly customer, you won't have to waste time playing "telephone tag," trying to track down someone to answer your questions about an order.

Why Sly?

Why We're Different:

- Holds the very first patent for a clohtype dust collector issued in 1902
- Wet Scrubbers + Dry Dust Collectors
- Replacement Parts for all makes and models of equipment
 - Filter bags
 - Cages
 - Cartridge Filters
 - Timers
 - Solenid
 - Diaphragm Valves
 - Repair Kits

Sample Processes:

- Fugitive Dust
- Ventilation
- Bin Vents
- Filter Receivers
- Exhaust from thermal processes
- Exhaust from size reduction processes
